Career Objective

Aspiring to secure a front-end development internship where I can leverage my expertise in Angular, Node.js, and responsive design to build intuitive and high-performance web applications. Committed to delivering exceptional user experiences, I am eager to collaborate with dynamic teams, contribute to innovative projects, and further hone my skills in modern web technologies.

Education

Institute of Culture and Science, Faculty of Computer Science
Third-level student, GPA: 2.62 (Good)

Sept 2022 – Present

Experience

Front-End Development Team Member

Feb 2025 – Present

- Collaborated with a multidisciplinary team on web development projects, focusing on front-end development using technologies such as Angular, HTML, CSS, and JavaScript.
- Participated in agile workflows, including sprint planning and code reviews, to ensure timely delivery of project milestones.

Courses

NTI MEAN Stack Diploma

Dec 2024 – Jan 2025

- Gained comprehensive training in MEAN stack development, focusing on MongoDB, Express.js, Angular, and Node.js through hands-on projects.

Manara Front-End Course

Aug 2024 – Sept 2024

- Developed proficiency in front-end development techniques, including advanced JavaScript, responsive design, and modern frameworks.

Front-End Development Course, MEC Academy

Feb 2023 – Aug 2023

- Acquired hands-on experience in front-end technologies through various projects, focusing on HTML, CSS, JavaScript, and Angular.

Projects

Hoor Quran

[Hoor Quran](#) 

- Developed a web application for Quran learning, featuring intuitive interfaces and responsive design to enhance user accessibility.
- Key Features: Interactive Quran study tools, educational resources, and multilingual support.
- Technologies: HTML, CSS, JavaScript

QuranSuhba

[QuranSuhba](#) 

- Developed a web application focused on Quran learning and community engagement, featuring user-friendly interfaces and responsive design.
- Key Features: Interactive Quran study tools, community discussion forums, and multilingual support.
- Technologies: HTML, CSS, JavaScript

CartShop.io

[CartShop.io](#) 

- An e-commerce web application developed using Angular, designed to provide users with a seamless online shopping experience.
- Key Features: Product listing, detailed product view, shopping cart functionality, responsive design, and routing.

- Technologies: Angular, Bootstrap, TypeScript, HTML, CSS

Caia Website

[Caia Website](#)

- An e-commerce platform developed with HTML, CSS, and JavaScript, including product pages, size selection, and 'Add to Cart' functionality.
- Technologies: HTML, CSS, JavaScript

Grilli - Amazing & Delicious Food

[Grilli - Amazing & Delicious Food](#)

- A restaurant website featuring a clean layout with sections for the menu and special dishes, enhanced with ScrollReveal.js animations.
- Technologies: HTML, CSS, JavaScript

MetroRide

[MetroRide](#)

- A car rental website built with HTML, CSS, and JavaScript, featuring smooth animations with ScrollReveal.js and form management using Web3Forms.
- Technologies: HTML, CSS, JavaScript
